Jose Antonio Muñiz

Finance Researcher · Actuary
+44 7521 434607 · j.a.munizmartinez@lse.ac.uk · London, UK

Biography

Finance researcher with a Ph.D. specialising in financial economics, corporate policy, monetary policy, and sustainable finance, and 6+ years of prior industry experience spanning insurance solvency regulation, fixed-income portfolio management, and pension reform consulting. Doctoral research, partially funded by the Bank of Mexico, examined ECB unconventional monetary policy regarding green asset purchase programmes, equity pricing of non-financial regulation, and voluntary disclosure in U.S. listed firms. Trained as an actuary and currently a Researcher at LSE's School of Public Policy producing quantitative policy analysis for senior government and institutional audiences. Published in the *Journal of International Money and Finance*, plus additional papers under review. Native Spanish speaker; research footprint across USA LATAM, Europe, and New Zealand.

Education

University of Bath — Ph.D. Finance 2025

Thesis: "Essays in Finance: Social Responsible Investment and its Policy Implications"
Supervisor: Prof. Shaen Corbet and Dr. Charles Larkin
Summary: The research addressed three linked questions. First, it examined how the ECB's green asset purchases create tensions between climate goals, bond market liquidity, and financial stability, with implications for central banks pursuing decarbonisation without distorting sovereign debt markets. Second, it found that stronger employee health and safety policies increase firm value around policy announcements, showing how equity markets price non-financial regulation. Third, it showed that early voluntary sustainability disclosure reduces information asymmetry and improves financial performance in US listed firms.

IPADE Business School — MBA 2016

Thesis: "An Alternative Permanence Bonus to Mitigate Actuarial Liabilities"

ITAM — B.Sc. Actuarial Science 2012

Current Job

School of Public Policy (LSE) — Researcher Jan 2026 – Present

With: *Prof. Vanessa Rubio-Márquez*

- Produced publication-ready policy and analytical articles for internationally recognised outlets, translating complex research on USA and LAC into accessible, high-impact commentary for senior government officials, multilateral and policy audiences.
- Led organisation of high-profile academic and policy events, securing participation from CEOs, cabinet-level officials, and leading scholars; directly strengthening LSE's external institutional relationships.
- Maintained an active academic publication pipeline by developing research papers for submission to top-tier journals, advancing original scholarship alongside a demanding policy and institutional remit.
- Applied quantitative policy analysis methods including econometric modelling, policy impact assessment, and causal inference techniques (R, Python, Stata) across different research projects.
- Managed the planning and delivery of academic, policy and industry events with senior speakers including CEOs, high-ranking government officials and established scholars to raise profile, strengthen networks and drive engagement.

Research Experience

Department of Management (LSE) — Guest Teacher (*Recurring fixed-term*) Dec 2021 – April 2026

- Assisted and guided *Executive Global Master's in Management* capstone projects across strategy, marketing, HR and finance.
- Advised students on research design, data collection and quantitative/qualitative methods tailored to applied business problems.

Institute of Policy Research (University of Bath) — Researcher Oct 2024 – Dec 2025

With: *Dr. Charles Larkin*

- Wrote policy briefings in a variety of topics with focus on quantitative analysis of monetary policies, pension laws, among others to be used by stakeholders in the decision-making process of new implementations or changes of existing policies.
- Conducted advanced research applying panel econometric modelling, difference-in-differences analysis, and time-series methods (R, Python, Stata) to monetary policy, pension regulation, and AI/Fintech impact assessment.

European Cooperation in Science and Technology — Researcher Sept 2022 – Sept 2024

Advisor: *Prof. Joerg Osterrieder*

- Presented quantitative analysis of AI and Fintech regulatory implications to academics and industry stakeholders at EU regulation committees, directly contributing to COST Action CA19130 deliverables.
- Built and deployed a web application (R/Shiny) enabling descriptive and comparative analysis of global financial time series across 40+ countries and asset classes, fulfilling a key Action deliverable.

Essex Business School (University of Essex) — Research Assistant April 2023 – Dec 2023

Advisor: *Prof. Silvia Gaia*

- Contributed to an FRC-commissioned study on the financial reporting consequences of the Wates Principles, bridging regulatory policy and empirical accounting research.
- Conducted NLP-based text analysis (Python, R) for UK private firms on a research project, measuring specificity and cross-firm similarity of governance disclosures in large private company reports.
- Developed a scalable similarity analysis pipeline applied to financial statements, producing evidence on variation in corporate governance code implementation across firms.

Teaching Experience

- Introduction to Mathematics for MSc — LSE 2025
- Global MSc Management — LSE 2025
- Introduction to Statistics for MSc Management — LSE 2025
- Stata Training: MSc Management— LSE 2025
- Stata Training: MSc Economics and Management — LSE 2025

- Introduction to Fintech (Adjunct to Prof. Shaen Corbet) — University of Waikato 2024
- Corporate Finance, Seminar Leader — University of Bath 2023
- Financial Mathematics II, Module Leader — ITAM 2020
- Theory of Interest, Module Leader — ITAM 2020
- Quantitative Tools for Business, Module Leader — IPADE Business School 2017–2018
- Decision Analysis, Guest Teacher— IPADE Business School 2017

Fellowships, Awards, And Honors

- **Bank of Mexico Doctoral Scholarship** — £20,000 — competitive award for doctoral research.
- **CONACYT / SEP Doctoral Scholarship** — £9,000 — Mexican national science and education fellowship.
- **COST Short-Term Scientific Mission Grant** — £2,000 — European Cooperation in Science and Technology.

Skills & Languages

- **Econometrics & Methods:** event-study, difference-in-differences, GARCH/EGARCH modelling, time-series analysis, NLP text analysis, causal inference, policy impact assessment.
- **Software:** R (advanced, incl. Shiny), Python (NLP, data pipelines), Stata, MATLAB, Qualtrics.
- **Finance Domains:** Sustainable finance, monetary policy, fixed income, derivatives, insurance (Solvency II), pension actuarial modelling, corporate governance, Fintech/AI regulation.
- **Languages:** Spanish (native), English (proficient/professional).

Conferences

- COST FinAI Conference — Reykjavik, Iceland 2024
- COST FinAI PhD School on Fintech and AI in Finance — University of Twente, Netherlands 2024
- SESTEF — Southampton Business School, UK 2023
- BAFA Financial Markets and Institutions SIG Conference — Nottingham Trent University, UK 2023

Industry Experience

Valuarte Consulting — Consulting Manager 2017 – 2020

- Led a five-person team advising government entities on pension law reform; developed actuarial and econometric models projecting long-term workforce liabilities and institutional risk, resulting in sustainable pension structures for new hires and measurable reduction in corporate actuarial exposure.
- Produced analytical reports for HR and strategy functions, explaining large administrative datasets into actionable financial and policy recommendations.

Citi Banamex — Portfolio Manager 2016 – 2017

- Managed the bank's mortgage-linked securities portfolio (MXP +$100M); modelled derivative instruments (CFDs) and analysed interest-rate sensitivity under Banxico monetary policy scenarios, supporting trading and portfolio decision-making.
- Built predictive models to quantify central bank policy transmission mechanisms across mortgage and debt exposures.

Old Mutual — Senior Actuary 2012 – 2014

- Oversaw valuation, projection and performance analysis for a product portfolio exceeding USD $485M in assets, identifying financial adjustments and risk-mitigation actions reporting to Head Office in South Africa.
- Led company-wide implementation of Solvency II (EU's risk-based capital regulatory framework) across the whole company, coordinating quantitative risk modelling, regulatory reporting, and internal control processes for the Mexican regulator (CNBV) and the Mexican Association of Insurance Institutions (AMIS).
- Presented Financial Impact Reports to the Risk Committee and supported regulatory due diligence with Mexican authorities.

Academic Service

- Reviewer: *Journal Supply Chain Management* (2).
